

The Lucite® cast acrylic surface of all MTI sinks is among the glossiest, highest quality surfaces available. Its hard, non-porous surface prevents dirt from accumulating and resists stains better than other materials. With normal use, cross-linked cast acrylic will retain its beauty with only a minimal amount of care. To maintain the high gloss, elegant look of the cast acrylic surface, follow these simple steps:

1. Use common household, **non-abrasive** cleaners for most cleaning jobs. (For example: Lysol Basin Tub & Tile Cleaner, Glass Plus, Simple Green, Mr. Clean, Top Job or a mild dishwashing detergent.) Follow manufacturers' directions and precautions. Rinse well and dry with a soft, clean cloth.
2. Never use abrasive cleansers.
3. Do not allow your cross-linked cast acrylic surface to come in contact with nail polish, nail polish remover, Wintergreen oil, dry cleaning solution, lacquer thinners, gasoline, pine oil, etc.
4. Remove dust or dry dirt with a soft, damp cloth.
5. Clean grease, oil, paint or ink stains with isopropyl (rubbing) alcohol. Dry with a soft, clean cloth.
6. Avoid using razor blades or other sharp objects that might scratch the surface. Small scratches can be removed by applying a thin coat of automotive paste wax and buffing lightly with a clean cloth. For deeper scratches, sand the surface lightly with a 400 grit "wet or dry" paper and buff with a fine grit buffing compound.

The MTI sink has been designed and engineered to resist scratches and stains when used properly. The durable finish will resist food acids and should not stain under normal kitchen conditions. Improper use may damage the sink or its finish and void the warranty.

Using your MTI sink: Protective mats, racks or dishpans may be used in the sink and the use of such products is recommended by MTI. Always use a cutting board or sink protector when using knives or sharp objects in or near the sink. MTI recommends that you do not place hot pans directly in your acrylic sink.

REMEMBER — If you do damage the sink, minor cuts or scratches usually can be buffed or polished out of the finish.
