▲ Lutron's HomeWorks QS system is, quite literally, an appliance for every room in the house. It's an energy-saving whole-home solution that gives you customizable control of every light in your home, as well as temperature, audio-visual systems, and even window coverings. Use it to automate and simplify your daily routine by turning groups of lights on or off, adjusting temperatures, opening and closing blinds with the touch of a single switch or at a pre-programmed time. But that's not all...the HomeWorks QS system uses technology like Radio Powr Savr occupancy/vacancy sensors to ensure that energy isn't wasted by operating lights in unoccupied rooms, and Hyperion Solar Adaptive Shading technology to adjust window coverings according to the angle of the sun. Convenience and energy savings are not the only benefits. HomeWorks QS provides security, too...think of it as an old lamp timer times infinity. This paragraph can't begin to describe the system's capabilities. Visit a Lutron Experience Center (in Pennsylvania, California, Florida, and New York) to experience its awesome power, or go to www.lutron.com/Products/WholeHomeSystems/Homeworksqs

▲ Gentle Ped foot spas from MTI Whirlpools provide a luxurious spa experience in the comfort of your own home. Whether you have a medical need to take special care of your feet or you just enjoy a nice soak at the end of a busy day, Gentle Ped fits the bill, with a shape designed to cradle the calves and relax the feet while adjustable jets massage away aches and pains. MTI's patented Fill-Flush cleaning system ensures that the spa's internal plumbing remains clean and sanitary. The cast-acrylic undermount unit is available in three sizes and 16 colors. www.mtiwhirlpools.com/about-products/specialty-tubs-sinks
