*Removing the frame around the shower created a more open expanse for a couple that appreciate open spaces. Design by Steve Salazar, CKD, Sea Pointe Construction. Photography: Larry A. Falke.*

- Showerheads are one of the easiest ways to add tremendous function to your showering experience. You can have a wide variety of spray patterns from pulsating, massaging, needle sprays and a bubbly spray. You might also want to try one of the rain showerheads that will drench you from the ceiling or a long shower arm. The experience is like standing under a waterfall in your own oasis.
- Heated built-in shower seats create a warm spot to sit or rest a foot for washing or shaving. Built-in decorative niches allow for shower and spa products to be organized and located in convenient spaces and heights.
- Larger spa showers can also incorporate luxury features such as chromatherapy. This is essentially mood lighting, creating a desired ambiance throughout the shower experience through colored light patterns. They can vary from an awakening experience to a restful, soothing, relaxing one.

*MTI Whirlpools brings the spa experience home with the Gentle Ped heated whirlpool pedicure bath.*

*American Standard's Premium Combo Massage Baths blend the Acumassage whirlpool system, exclusive Smooth Air™ massage and soothing Chromatherapy lighting.*
